

24 September 2026 | 13:30 – 15:30

Multi-Tasking Machines for Productivity and Precision

As manufacturing becomes more complex and competitive, multi-tasking machines are emerging as a key solution for modern production.

Featuring insights from leading global machine tool builders including Okuma, Mazak, Index and Tongtai.

This session will explore how integrating multiple processes into a single platform can reduce cycle time, simplify operations, and improve overall productivity.

Hear directly from leading global machine tool builders as they share practical insights on machine design, real-world applications, and how manufacturers can leverage multi-tasking technologies for better performance.

What you will learn:

- How to reduce cycle time and process steps
- Ways to improve productivity without increasing complexity
- How to evaluate and select the right multi-tasking solution
- Investment perspectives for long-term manufacturing efficiency

Who should attend:

Plant managers, manufacturing engineers, and decision-makers looking to enhance production performance
