Mac in Smart Manufacturing: Enhancing Employee Experience and Enterprise Management

Presented by Metro Systems Corporation Public Company Limited

Session Overview

Smart Manufacturing is not only about transforming machines and production processes. It also requires a modern work environment that enables employees to work more efficiently, securely, and seamlessly. As digital devices become increasingly integrated into the workplace, effective device management and IT infrastructure are becoming important elements of enterprise transformation.

This session explores how **Mac can support Smart Manufacturing** by providing employees with a secure, high-performance, and user-friendly work experience. It will also examine how organizations can deploy, manage, and protect Mac devices at scale through centralized device management and comprehensive lifecycle services.

Attendees will gain practical insights into **Zero-Touch Deployment, Device Security, and Centralized Device Management**, as well as approaches for integrating Mac into existing IT environments. The session will highlight how organizations can establish a more streamlined and secure approach to device management across the enterprise.

The session will also provide an overview of **MSC's end-to-end services**, covering consultation, deployment, device management, and ongoing technical support throughout the device lifecycle.
